To Whom it May Concern:

It is my pleasure to recommend Kishor Kumar Andekar, a master student in Computer Science at University of Central Missouri. In Summer 2023, Kishor was a student in my Advanced Database Systems course.

The course provided many topics of Database Systems. Students need to form a group for team project. Kishor performed leading, and hard working to achieve the excellent database application project.

In class, Kishor was one of the top students. He interested in the course materials and did very well in all written and programming assignments. He also has good communication skills and has experience in Software Development for 8 years.

If you have any questions, please feel to reach out to me at the contact information above.

Sincerely,

Dr. Khomsun Singhirunnusorn
